Data Center World Announces Global Expansion With New 2026 International Event Series

2026 Events Planned Across Asia, Australia, Brazil, Europe, India and the Middle East

WASHINGTON – January 14 – As governments, utilities and enterprises race to meet unprecedented AI-driven demand, [Data Center World](#), the premier global event for data center IT infrastructure and innovation, today announced a major international expansion with a slate of new events launching across key global markets in 2026.

Building on the success of its flagship U.S. conference, the Data Center World portfolio will now expand into Asia, Australia, Brazil, Europe, India and the Middle East, creating a global platform to showcase what's next in data center innovation, education and collaboration.

The expanded lineup reflects the accelerating worldwide demand for digital infrastructure worldwide, driven by AI adoption, cloud growth, sustainability initiatives and surging data consumption. Each regional event will deliver Data Center World's signature combination of expert-led education, strategic insights and access to best-in-class technology providers throughout the world.

The 2026 global event lineup includes:

- **Data Center World (U.S.)** – April 20–23, 2026 | Washington, D.C.
- **Data Center Asia 2026 Series**
 - Hong Kong – July 8–9, 2026
 - Jakarta – September 2–5, 2026
 - Kuala Lumpur – November 10–12, 2026
- **Data Center World Australia** – September 7–9, 2026 | Melbourne, Australia
- **Data Center World POWER** – September 21–23, 2026 | Dallas, Texas
- **Data Center World Brazil** – October 6–8, 2026 | São Paulo, Brazil
- **Data Center World Europe** – October 13–14, 2026 | Vienna, Austria
- **Data Center World India** – October 22–24, 2026 | Greater Noida, India
- **Data Center World Middle East** – October 2026 | Location TBA

“Data centers are no longer a local concern - they are a global priority with strategic significance on the future of AI, energy and economic growth,” said Tara Gibb, Senior Director, Informa Connect. **“Each Data Center World event will explore the intersection of technology, energy, policy and community impact shaping the data center development worldwide and still reflect the unique regulatory and infrastructure realities of each region.”**

Backed by the powerful network of Informa Connect with 450 international events attended annually by over 12,000 professionals, digital content and training platforms, Data Center World

cements its role as the definitive global forum for the leaders building, powering and securing the world's digital infrastructure.

ABOUT DATA CENTER WORLD

Data Center World is the leading global conference for data-center facilities and IT professionals, delivering premier education, expansive networking, and the widest access to best-in-class vendors. For more than 40 years, the event has helped data center and IT infrastructure leaders navigate an increasingly complex and AI-driven landscape. The event provides top-quality, vendor-neutral insights that empower professionals to solve real-world challenges. CIO Dive named Data Center World one of the top technology conferences to attend in 2024 for the second consecutive year. Additionally, for the fourth year in a row, Data Center World has been recognized by Trade Show Executive as a fast-growing trade show.

Data Center World 2026 will be held April 20–23 in Washington, D.C., uniting thousands of senior practitioners and hundreds of solution providers to explore the future of AI-ready infrastructure, sustainable power, edge and hyperscale innovation, and next-generation facilities.

Data Center World continues to expand its global footprint. To access the Data Center World Global Event series, visit [Data Center World's Global Events](#).

Data Center World is produced by Informa PLC in partnership with AFCOM.

ABOUT AFCOM

AFCOM advances data center and IT professionals by delivering comprehensive and vendor-neutral education and peer-to-peer networking to its members around the world. Through forward-looking research, AFCOM supports thousands of IT, operations, facilities, builders/designers and vendors working in the data center and IT infrastructure industry. In serving the data center industry for more than 40 years, AFCOM has earned recognition as the market leader in educating, connecting and guiding the data center community.
